Counselling Psychology is a programme that is specially designed to fulfil the demand for knowledge and skills in counselling psychology for professionals with an interest in counselling. The programme provides professional and practical qualification in real - life counselling expertise for people practising counselling psychology including in organisations, health including hospitals and hospices, social welfare including pastors of religion, social workers and in education, community and rehabilitation, and human resource management. There is augmented growth in psychological counselling as a result of increased demand for psychological services in many different settings. Counselling psychology seeks to alleviate and resolve human issues as well as improve psychological, social, mental and general life. These include: at the workplace, industries, hospitals, prisons, places of worship, schools and other areas. Counselling psychologists will be needed to assist people handle various situations such as addiction, stress, marriage and family issues, youth and work related issues. The objectives of the programme are to ensure an advanced level of knowledge about major approaches to counselling psychology; to provide training in counselling practice and develop skills for application in workplace, health, education; and to advance research, ethical and professional issues in counselling as a profession.
